MARCH 1963

CURRENT SERIAL RECORDS

## DECEMBER-FEBRUARY PIG CROP:

The December 1962 - February 1963 pig crop in the 10 Corn Belt States totaled 12,570,000 head, according to the Crop Reporting Board. The pig crop reported for these States is the number of pigs from litters farrowed during December through February that are still on hand or have already been sold.

The number of sows farrowing totaled 1,842,000 head, slightly more than the 1,834,000 head farrowing a year earlier and 2 percent more than the 1957-61 average of 1,804,000 head. Increases in Ohio, Wisconsin, Minnesota, Missouri, and Nebraska offset decreases in Illinois, Iowa, South Dakota, and Kansas. Indiana farmers' reported farrowings for December through February were the same as a year earlier. On December 1, 1962 farmers in the 10 States reported intentions to increase December 1962-February 1963 farrowings by 2 percent. Of the sows farrowing during this period, 398,000 farrowed during December, which was 17 percent more than the 340,000 head farrowed during December 1961. The number of sows farrowing in January 1963 was 608,000 head, 5 percent more than the 579,000 head a year earlier. During February 1963 the number of sows farrowing, at 836,000 head, was 9 percent less than the 915,000 head farrowed during February 1962.

## MARCH-MAY FARROWINGS:

The number of sows bred and intended for farrowing in March, April, and May in the 10 States total 3,758,000 head, 4 percent more than were farrowed a year earlier. All States show increases in the number of March-May sows to farrow. Increases ranged from 1 percent in Iowa and Minnesota to 16 percent

Beginning with this report additional data on the pig crop and hogs on farms are included. The number of all hogs is divided into 2 groups: "hogs for breeding;" and "other hogs." Other hogs are broken down into 5 weight groups. The number of sows farrowing during the previous quarter and the number of sows expected to farrow during the next 3 months are shown by months. The "pig crop" will be estimated by quarters. A similar report for these States will also be issued for June 1, September 1, and December 1. Formerly, a part of the quarterly program was financed in the 10 States by matching funds provided jointly by State agencies and the United States Department of Agriculture under provisions of the Agricultural Marketing Act of 1946.

in Missouri. The breakdown by months is for 1,360,000 sows to farrow in March, 1,474,000 in April, and 924,000 in May.

The total of the March-May intentions as now reported represents very little change from that reported on December 1, 1962 in the 10 States.

#### JUNE-AUGUST INTENTIONS:

Reported breeding intentions indicate 2,403,000 sows to farrow during June through August in the 10 States. This is 1 percent more than a year earlier and 6 percent more than the 1957-61 average. Six of the 10 States show increases in June-August sows as follows: 7 percent in Nebraska; 4 percent in each Wisconsin, Missouri, and Kansas; 3 percent in Ohio; and 2 percent in Illinois. Indiana and Iowa farmers plan no change from last year, while 5 percent decreases are planned in both Minnesota and South Dakota.

#### ALL HOGS AND PIGS UP 1 PERCENT:

The number of hogs and pigs on farms March 1, 1963 totaled 41,608,000 head--1 percent more than the 41,175,000 head on farms a year earlier. Inventory numbers compared with March 1, 1962 were 2 to 6 percent larger in 8 States and 1 and 5 percent smaller in Indiana and Illinois, respectively. The States with larger inventory numbers were Wisconsin, Minnesota, Iowa, and Nebraska, each up 2 percent; Ohio and South Dakota, each up 4 percent; and Missouri and Kansas, each up 6 percent from the March 1, 1962 numbers on farms.

The number of hogs and pigs used or to be used for breeding totaled 8,189,000 head and comprised 20 percent of all hogs and pigs on farms March 1, 1963.

Other hogs and pigs on March 1, 1963 accounted for 33,419,000 head or 80 percent of all hogs. Of these, the percentage of total and number in each weight group are as follows: 34.7 percent or 11,586,000 head, under 60 pounds; 23.3 percent or 7,785,000 head, 60-119 pounds; 25.1 percent or 8,387,000 head, 120-179 pounds; 13.4 percent or 4,500,000 head, 180-219 pounds; and 3.5 percent or 1,161,000 head, 220 pounds and over.
